***Status of the Claims***

Claims 1-28 have been presented for examination.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-<sup>b</sup>, 12-15, and 17-25, drawn to a method of preventing demyelination of nerve cells, classified in class 514, subclass 2 and 12.
- II. Claims <sup>1</sup>~~b~~-11, 16, and 26-28, drawn to a NGF composition, classified in class 530, subclass 399.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the NGF product can be used to induce proliferation and differentiation of oligodendrocytes (page 1 of disclosure).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
